

# ZENIX

**THE MOST RELIABLE CRYPTO ASSET**

**Music CREATOR APP**  
**Advertisers PLATFORM APP**  
**Whitepaper ver 1.0**

# OUR ECOSYSTEM

Decentralized Finance (DEFI), ZENIX project allow holders to stake ZENIX.

Music for creator, Collab Music platform that allow creator to share music with reward ZENIX

Business advertisers, Ads platform that Allow Small Business to promote product using ZENIX

# OUR PROJECT

## SYNC Music App

The music industry generates revenue of \$43 billion, but only 12% is allocated to

content artists. Furthermore, artists have minimal control over streaming their music. To address these and other issues faced by artists, we introduce SYNC Music app, a fully decentralized music streaming protocol built on public blockchain infrastructure and other decentralized technologies.

Sync Music app enables artists to distribute their music and receive direct payments from their fans, and it consists of the following components:

- An efficient token supported by the SYNC Music platform (Zenix token), third-party stablecoins, and artist tokens.
- Decentralized storage solutions and a ledger for sharing audio and metadata.
- A unique track encryption scheme paired with a programmable mechanism to unlock user-specific proxy re-encryption keys for content.

The SYNC Music app protocol will be active soon and fully decentralized, operated by a strong decentralized community consisting of artists, fans, and node operators, serving approximately 500,000 users every month

# ZENIX DEFI STAKING

Zenix DeFi Staking Platform (Dapp) aims to enable users to stake Zenix without losing the ability to trade or use their tokens in other ways. The Zenix Token will serve as a decentralized infrastructure for issuing more secure liquid tokens compared to staking on exchanges and offers exceptional flexibility compared to self-staking.

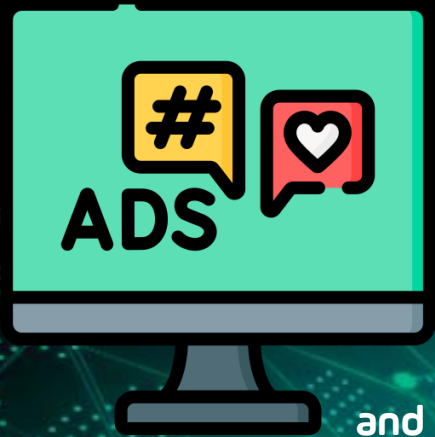

**Safe and Flexible Staking:** The Zenix Token allows users to stake Zenix with a high level of security. They do not need to trust centralized exchanges or other platforms for staking.

**High Liquidity:** Zenix Tokens are designed to remain liquid so that users can easily trade them without waiting for the staking period to end.

**No Asset Loss:** By using Zenix Tokens, users do not lose ownership of their assets. This means they can continue to use and utilize their Zenix while earning staking rewards.

**Decentralized Infrastructure:** This platform operates in a decentralized manner, eliminating the risks associated with centralization and prioritizing DeFi principles.

## **AdsChain Crypto Advertisers App**

**Brief Description:** AdsChain is a revolutionary blockchain-based ads platform designed to help advertisers and publishers maximize the results of their campaigns. We provide an efficient and transparent way to create engaging crypto ads, target the ideal audience, and manage budgets based on real-time

results, all thanks to innovative blockchain technology and the sophisticated Zenix token.

- 1. Creating Engaging Crypto Ads: Ad Templates:** AdsChain will provide various customizable crypto ad templates, including appealing graphics and compelling text. **Visual Ad Creator:** Users can easily create their own visual ads with an intuitive ad creation tool.
- 2. Targeting the Ideal Audience: Data Analysis:** AdsChain will provide in-depth data and analytics about the crypto audience, allowing users to pinpoint the most relevant target audience. **Geographical and Demographic Targeting:** Users can specify targeting based on geographical location, age, gender, interests, and more.
- 3. Real-Time Budget Management: Payment Using Zenix Token:** AdsChain's payment system uses the Zenix token, enabling fast and secure transactions across the platform. **Budget Management:** Users can set their daily, weekly, or monthly budgets and track their expenditures in real time.
- 4. Blockchain Transparency: Smart Contracts:** AdsChain employs blockchain smart contracts to ensure transparency in offers and campaign tracking

# ZENIX ROADMAP

Q4 2023

## Creation of Our Company

Project Concept, Website Development,  
Marketing Plan, Whitepaper Creation

## MVP Released

Add Liquidity on DEX, MVP of DeFi Staking  
Released, Version 2.0 of Whitepaper  
released

Q1 2024

Q2 2024

## Listing and App Development

Listing on several Big Exchanges, Start for  
Music Creator Platform development

## Music Creator App Testing

Release music creator apps for beta  
testing, Start develop for Advertiser app

Q3 2024
